Lutron™ 

What is pleasance?

Pleasance is a fundamental feeling that is hard to define but that people desire to experience.*

Your home is more than walls and a roof, more than simply a functional space. Your home is a place where you experience **comfort, romance, and peace of mind**—a place where you experience pleasance.

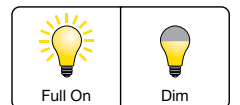

We believe the right light is a critical building block for pleasance, and the first step for enriching every moment within your home.

Let us show you how our solutions—which are easy to add to a **new** or **existing** home—can help you add pleasance.

For energy-saving ideas look for energy strategy icons throughout this brochure, such as the dimming strategy icon shown here.

Creating just the right light

Light Control

Maestro® dimmer shown in limestone (actual size)
Pico® wireless control shown in white (actual size)

Select Lutron® dimmers to work with:

Incandescent/halogen bulbs

Compact fluorescent bulbs

LED bulbs

Create pleasure with a simple dimmer.

With a switch you can only turn lights on and off, so you're limited to bright light or no light at all.

If you replace a switch with a dimmer, such as a Maestro dimmer, you can adjust a room's light level to create a totally new atmosphere.

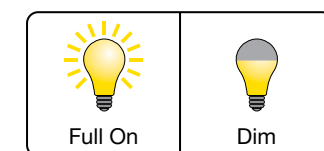

Add a little romance

With a Maestro dimmer, you can lower lights in your dining room for a romantic dinner, or brighten them for family meals.

Saving energy without sacrifice

Every time you dim the lights you save energy. Dimming by **25%**, for example, saves **20%** energy. Dim more and you'll save even more.

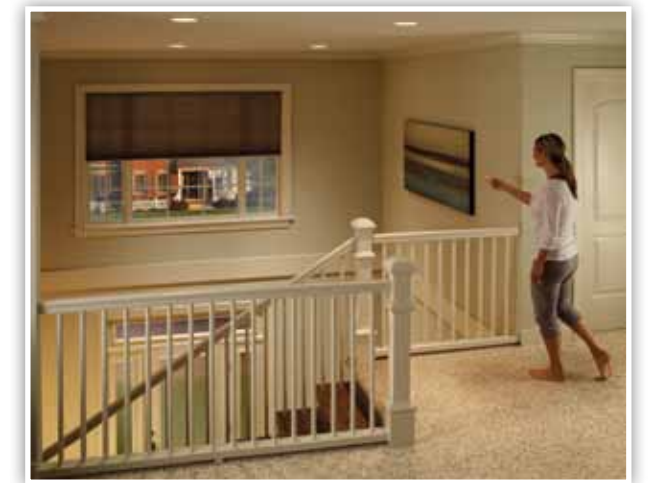

Create pleasure by controlling your window treatments at the touch of a button.

You probably think of shades as a design element. Add automation to them, though, and they become a functional and magical element.

With the press of a button, you can lower Sivoia® QS wireless shades so they block glare, creating a more comfortable room.

And if you install automated shades in hard-to-reach windows, such as a foyer, you can easily adjust them for privacy.

Sophisticated daylight control

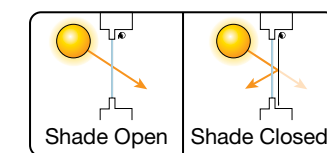

Other styles available

As you can see in the photo above, our shades align perfectly. We offer Venetian blinds, Roman shades, draperies, Kirbé® vertical drapery system, roller shades, and tensioned shades. See page 22 for details.

Our battery powered shades, shown on these pages, have a 3-year battery life; available with an optional Pico® wireless control.

Saving energy without sacrifice

Adjusting shades based on the season can save you **10-30%*** on heating and cooling costs.

*Lutron® commissioned simulation by T.C. Chan Center for Building Simulation and Energy Studies, University of Pennsylvania, September 2008.

Shade Control

Combine light and shade control to take pleasure to the next level.

Having coordinated control provides greater flexibility in a room than having individual control, letting you fine-tune the mood you want to create.

With a Maestro Wireless® system, you can control multiple lights (even table and floor lamps) with one button press and multiple shades with another button press.

When you're in your home theater, you can dim the lights and lower the shades to watch the big game—all from the comfort of your couch.

(And because the system is wireless, it's easy to install into any space.)

Coordinated control

Light Control

Shade Control

Appliance Control

Pico® wireless **light** and **shade** remote controls shown in white (actual size)

Additional control

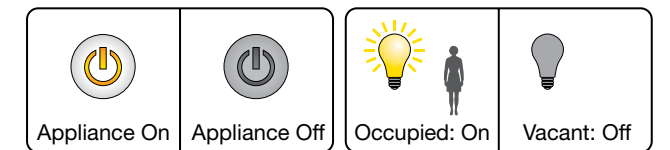

Expand control in a room by adding appliance control, occupancy/vacancy sensors, and lamp dimmers.

The plug-in appliance module turns off standby power to small appliances, such as AV equipment, when they're not in use.

Sensors turn lights on automatically when you walk into a room and off when you leave.

Saving energy without sacrifice

Standby power can amount to up to **10%** of a home's electricity use. An occupancy sensor can save up to **20%** lighting energy. So by combining light, shade, and appliance control, you can capitalize on your energy savings.*

Expand **pleasance** from a single room to a whole home

Pleasance goes beyond basic light control. To fully experience the essence of pleasance™, let's explore how a Lutron® RadioRA® 2 or HomeWorks® QS system can redefine the way you live.

10 Control from anywhere

Take advantage of easy, convenient control from a keypad or your mobile device.

12 Added integration

Integrate your Lutron system with your home control for added functionality.

14 The right temperature

Ensure you're never too hot or too cold, with temperature control.

16 Tying in your security system

Enhance your security system for added peace of mind and greater energy savings.

18 Customization

Choose HomeWorks QS for the ultimate in pleasance.

20 Control styles and colors

Complement the look and feel of any room.

22 Shade styles and fabrics

Select from a variety of styles and fabrics.

24 Ivalo® collection

Add sophisticated, high-efficiency fixtures.

Control from anywhere

Light Control

Appliance Control

Temperature Control¹

Wall-mounted seeTouch® keypad in white (actual size)

Lutron® Home Control+ app

Pleasance is also having control no matter where you are, home or away.

RadioRA® 2 and HomeWorks® QS systems offer control of lights, shades, and temperature from wall or tabletop keypads, as well as your mobile device.

The main benefit of a keypad is that you can create customized “scenes”—predetermined settings for lights, shades, and temperature¹.

When you press a keypad button, lights, shades, and temperature automatically adjust to the levels you designated for that scene.

The number of buttons on a keypad is based on the number of different scenes you want to create in a room.

Control from a keypad also means you’re always in touch with your system—from your car, your bedside, or your vacation home.

Saving energy without sacrifice

With a keypad, you can always manage the energy use in your home, even while you’re away.

¹Please see page 14 for more information on temperature control.

Expand the benefits of pleasure with user-friendly, tech-smart integration.

Integrating a RadioRA® 2 or HomeWorks® QS system with your home's technology provides user-friendly, advanced control.

For example, integration with your AV system means one button press will soften lights, lower shades and the projector, and start the movie.

Lutron® Home Control+ app

Added integration

Light Control

Shade Control

Appliance Control

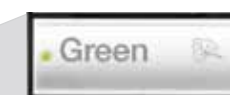

Temperature Control¹

seeTouch® tabletop keypad in midnight (actual size)

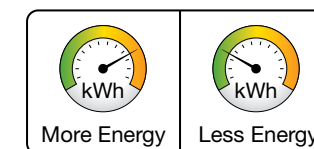

Save energy with the "Green" button

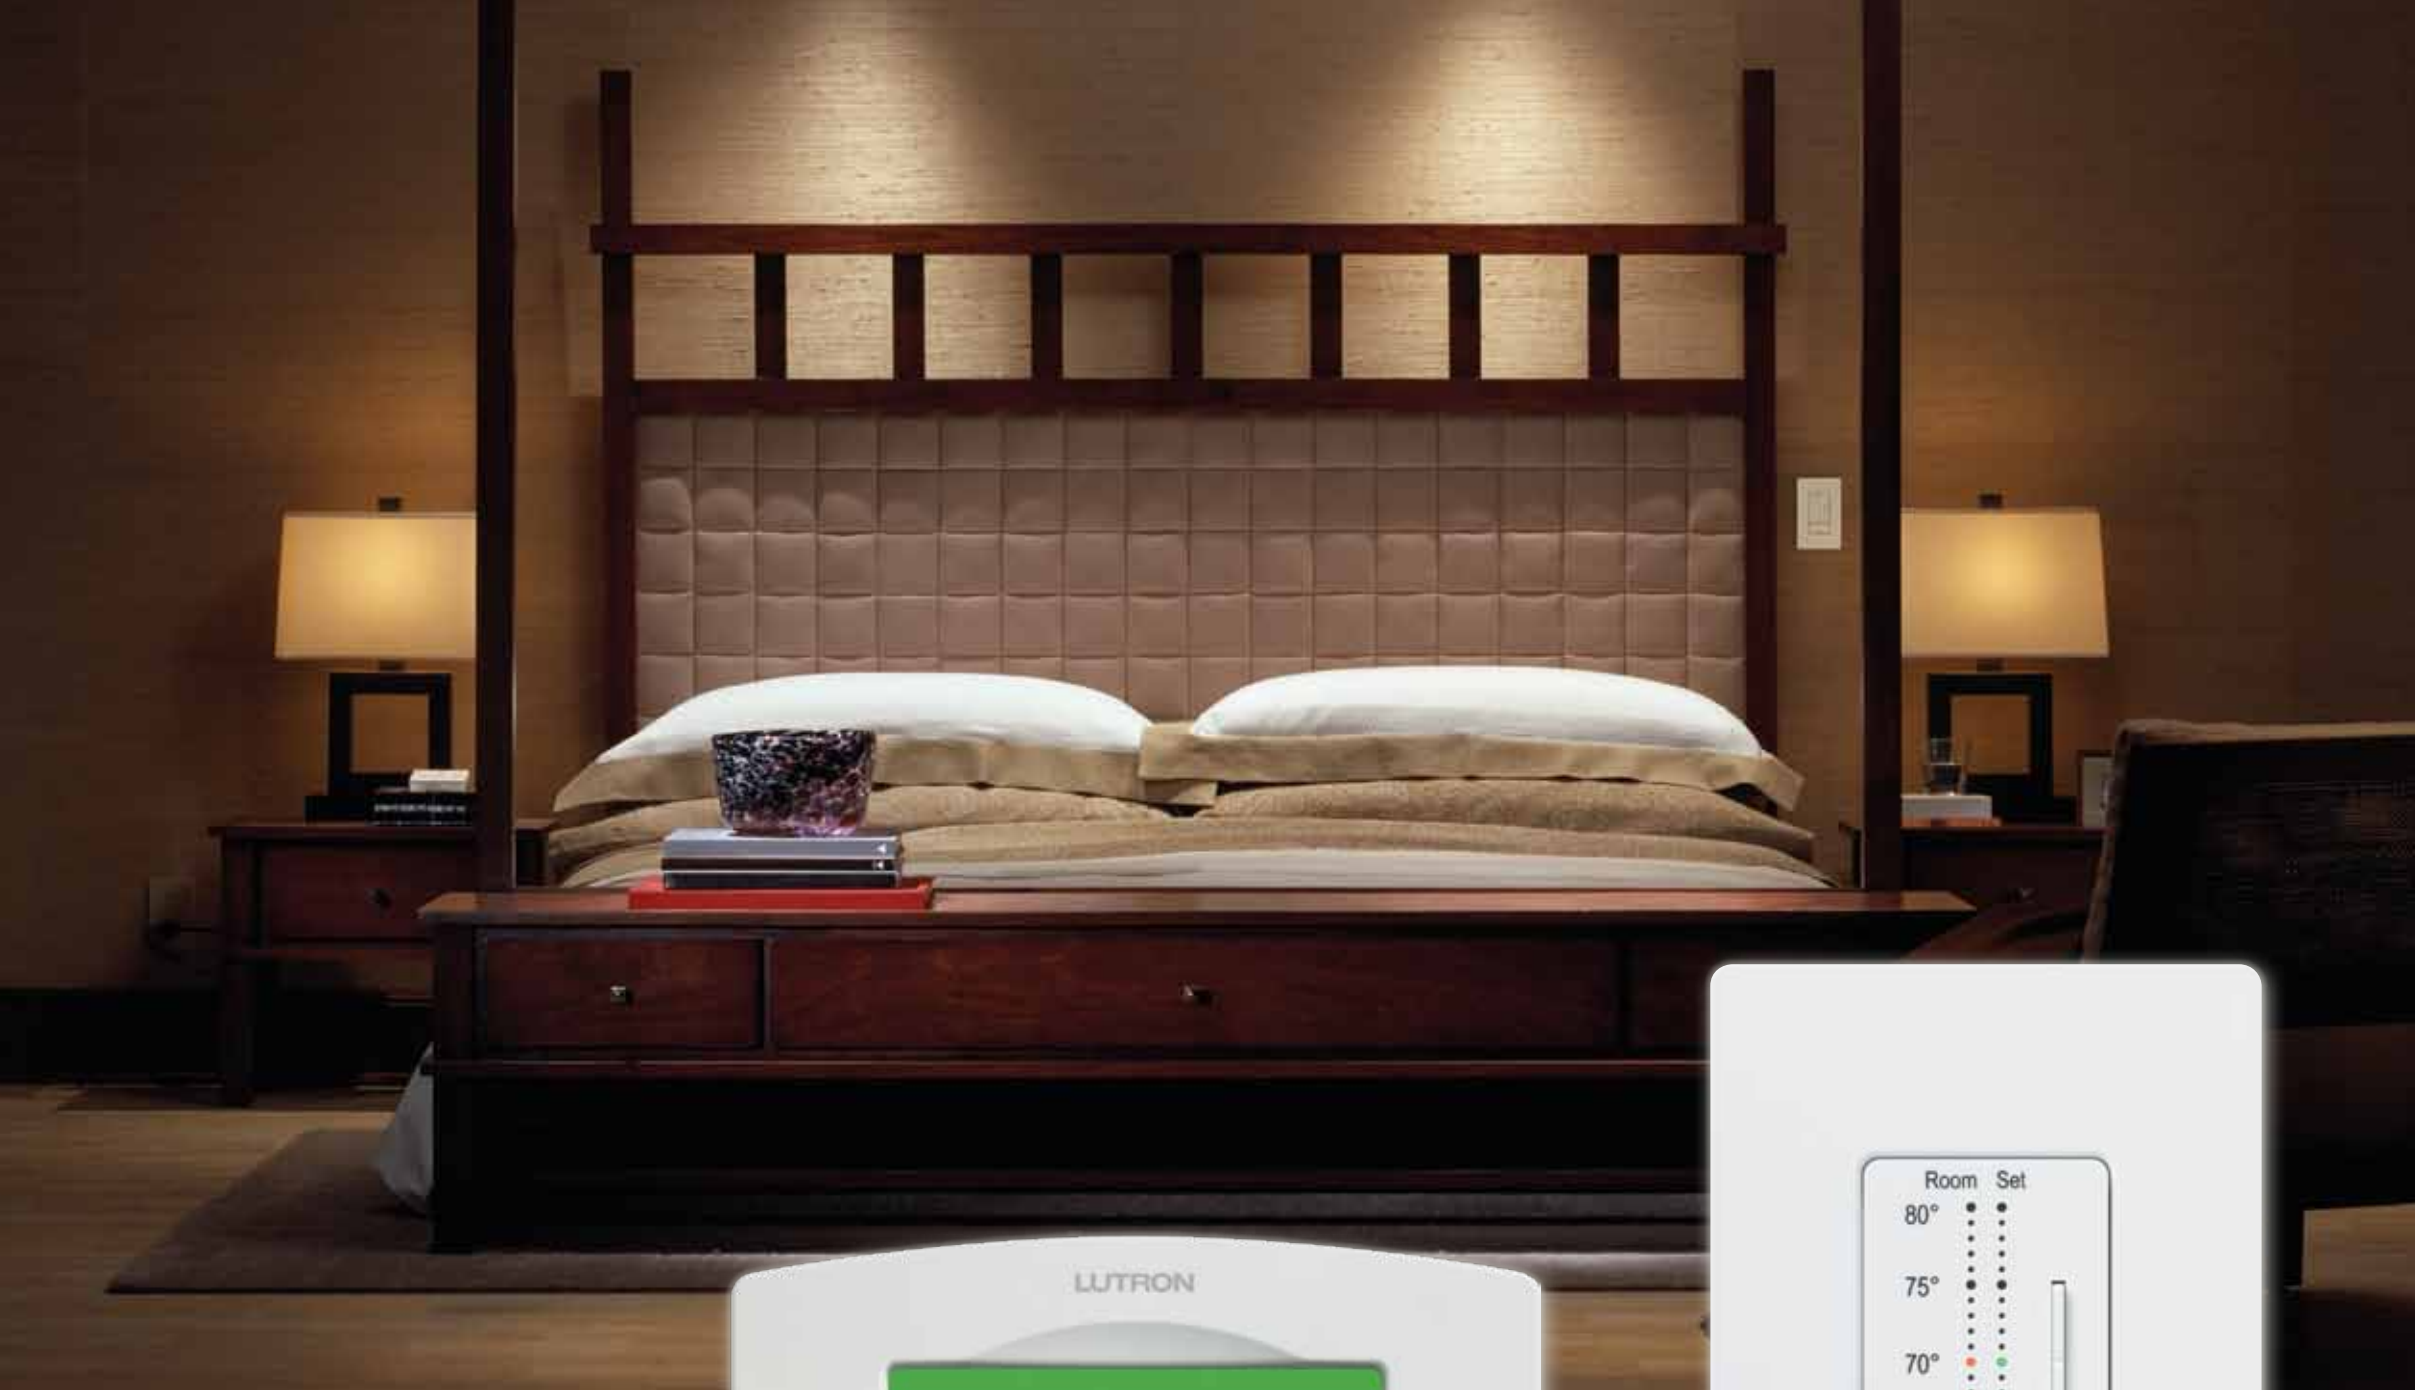

Saving energy without sacrifice

Integration also gives you a convenient way to save energy. The "Green" keypad button automatically dims lights by **5%**, lowers shades, and sets back temperature by **2%**.

¹Please see page 14 for more information on temperature control.

The right temperature

Temperature Control

TouchPRO Wireless™ thermostat

seeTemp™ wall control in white (actual size)

Wireless temperature sensor (actual size)

Add temperature control for increased comfort and enhanced pleasure.

We offer two types of control that work with both RadioRA® 2 and HomeWorks® QS systems.

Classic design

Our all-in-one solution looks like a conventional thermostat and is a simple, cost-effective way to add Lutron control to your temperature system.

Unique design

Our 3-part thermostat provides precise temperature control from room to room. This solution has a wall control with a clean aesthetic and a hidden HVAC controller.

- **seeTemp wall control**

You can mount the wall control in places that wouldn't normally be appropriate for a thermostat, such as a sunny space.

You can also install up to 10 controls throughout your house for convenient control from any room, such as your bedroom.

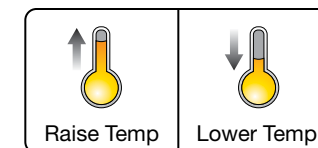

- **Wireless temperature sensor**

You can install up to 4 wireless temperature sensors in rooms where you want to measure the temperature.

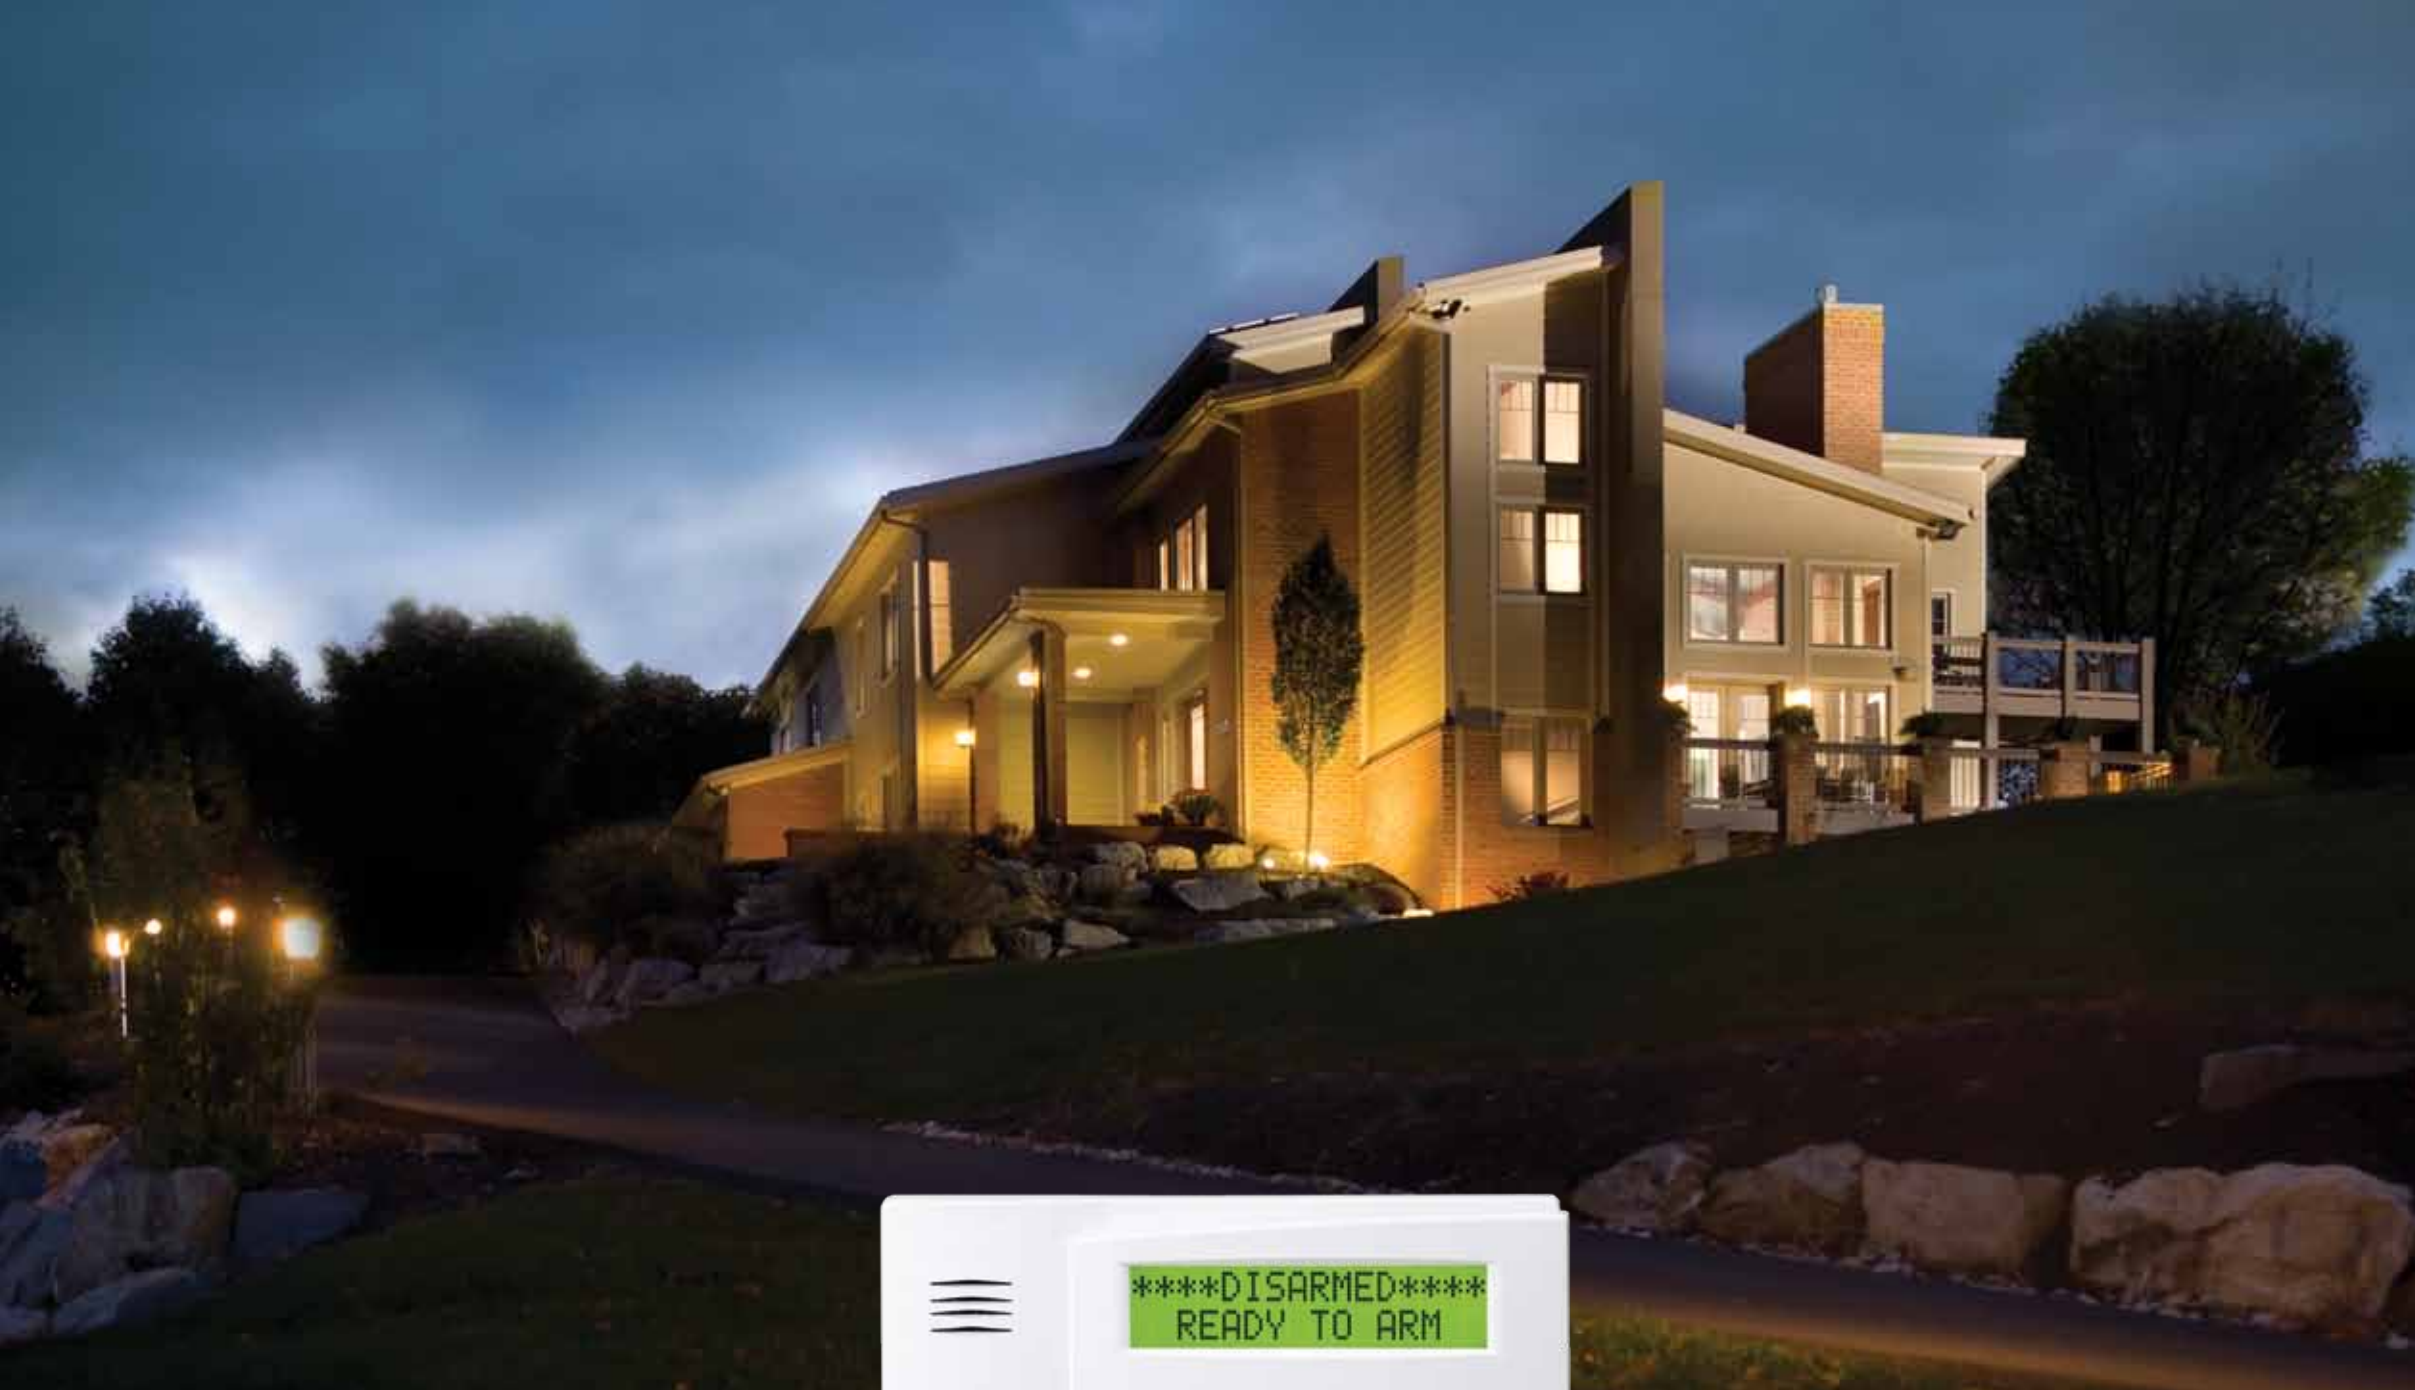

The sensors average the temperature and communicate to the HVAC system to adjust heating or cooling.

Saving energy without sacrifice

Setting back the temperature when a room is unoccupied can help you save significantly—up to **16%** or more.*

*www.energystar.gov

Pleasance means you feel safe in your home or while you're away.

By integrating your security system with a RadioRA® 2 or HomeWorks® QS system you have the added enhancements of light and shade control and the benefits they provide.

Visible alert

If someone breaks into your home when your security system is activated, your lights will turn on, your outside lights will flash, your shades will raise, and your keypads will lock so your lights stay on.

Timeclock events

Your Lutron® system's timeclock and your security system can work in tandem so that your home looks occupied when you're not there.

The timeclock can trigger lights to turn on, dim, and turn off and raise or lower shades based on your normal routine.

Tying in your security system

Security system keypad

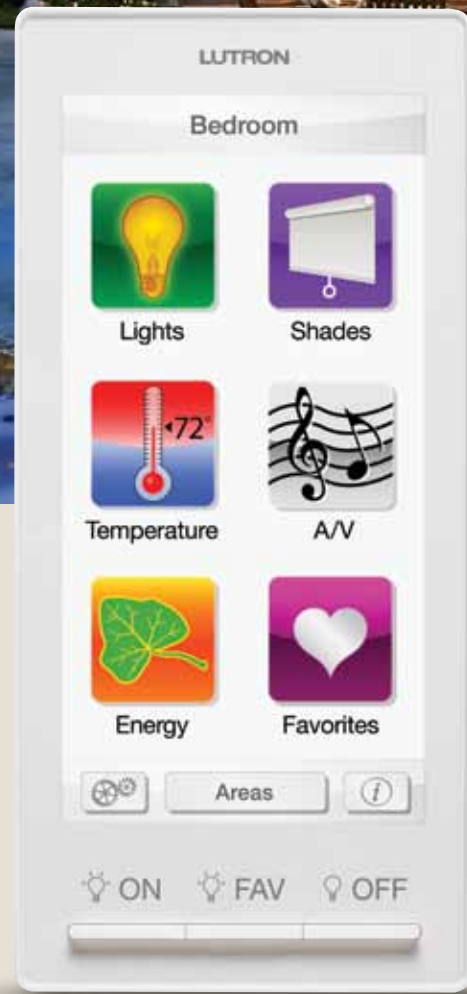

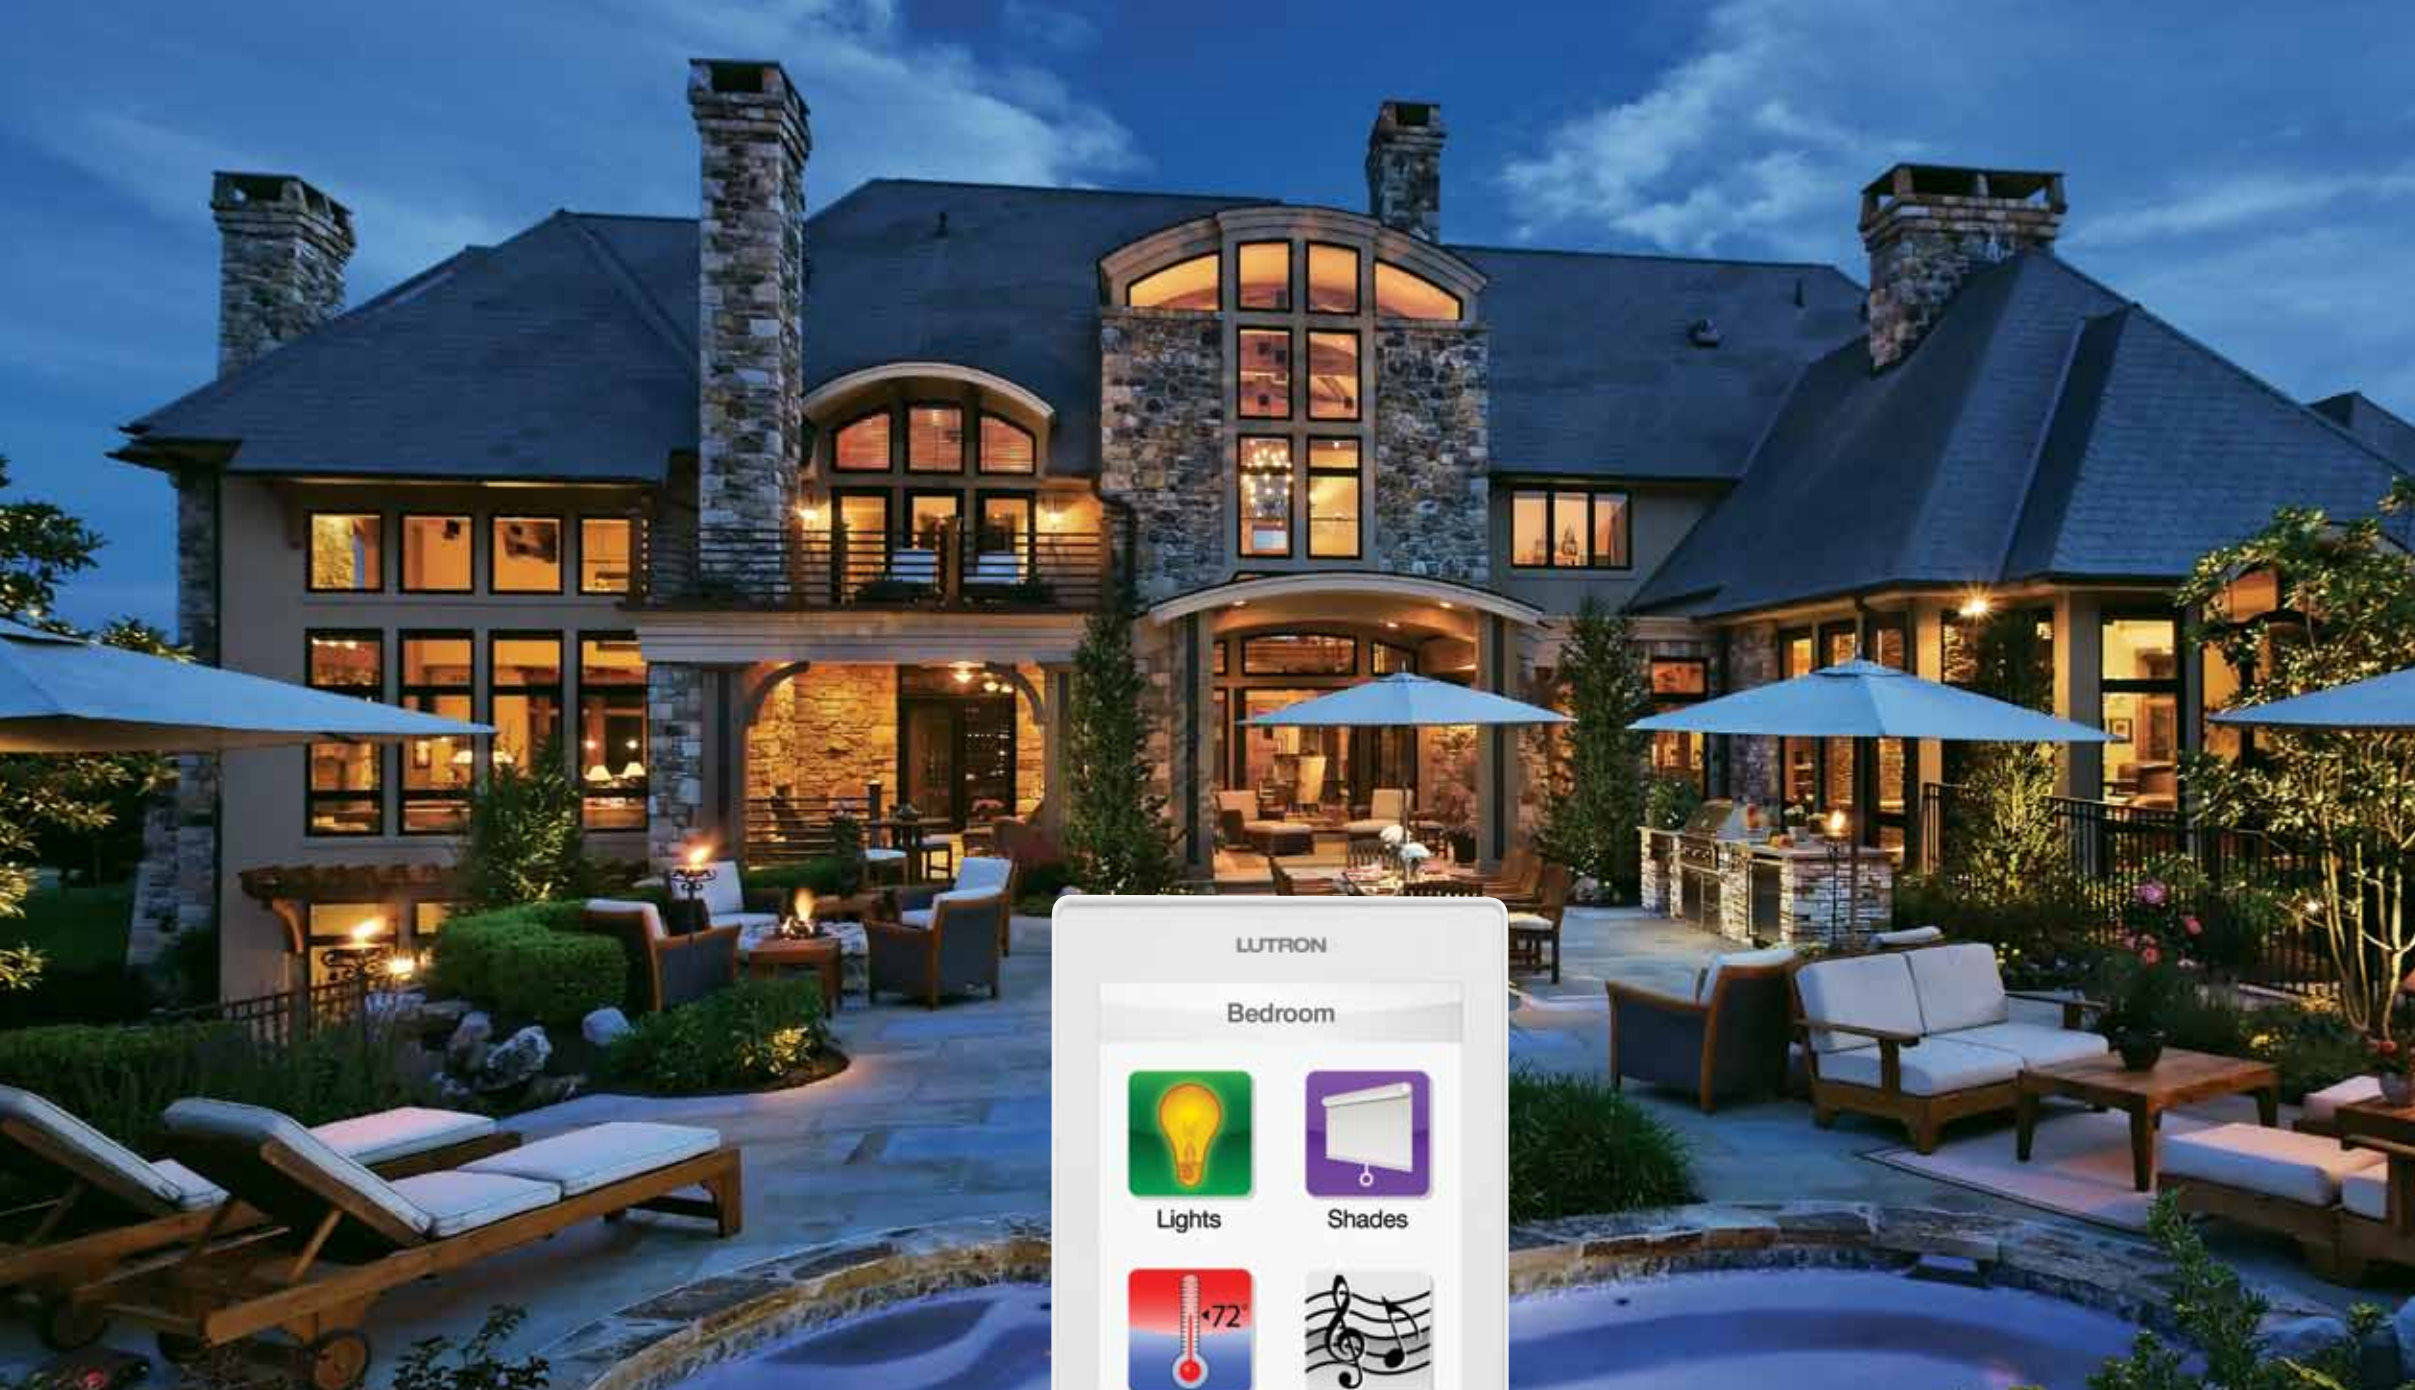

Use the car visor control to turn lights on as you arrive home. Our systems are also HomeLink® compatible, so that you can adjust lights and shades from your car's HomeLink controls.

Saving energy without sacrifice

With security system integration, one button press will not only arm your security system, but will also roll back temperature, turn lights off, and lower shades.

Alternative control

You may prefer the clean aesthetic of one sleek keypad, such as the dynamic keypad shown here, rather than a row of dimmers on your wall.

With HomeWorks QS, you don't need a dimmer for every light you want to dim. All you need is a keypad.

Customization provides the ultimate in pleasance.

For advanced integration and customization, HomeWorks QS has added features.

"Thinking" buttons

HomeWorks QS keypad buttons can think for you, creating different light scenes from the same button, depending on the time of day.

For example, pressing the "Pathway" button between 10 p.m. and 5 a.m. creates a path of light to your bathroom. Pressing it after 5 a.m. creates a path of light to your kitchen.

Custom interfaces

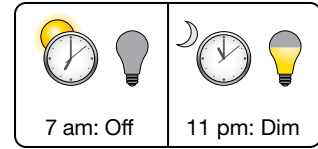

You can combine HomeWorks QS keypads with other manufacturers controls to maintain a consistent look throughout your home.

Saving energy without sacrifice

Customization means you can program settings to adjust based on specific criteria, such as season or day of the week.

During the summer, for example, you might want your landscape lighting to dim at 11 p.m., while during the winter you want it to dim earlier.

Control styles and colors

Pleasance is being able to complement the look and feel of any room.

Architectural style

- Available for HomeWorks® QS
- Square corners
- Beveled edges
- Available in Architectural matte and Architectural metal finishes

Designer style

- Available for RadioRA® 2 and HomeWorks QS
- Round corners
- Squared edges
- Uses standard designer style opening
- Available in designer gloss and Satin Colors® finishes

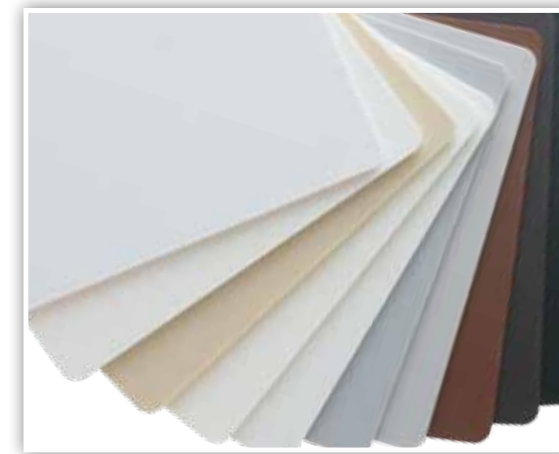

Choose from gloss, satin, matte, and metal colors and finishes for dimmers, wallplates, keypads, and accessories.

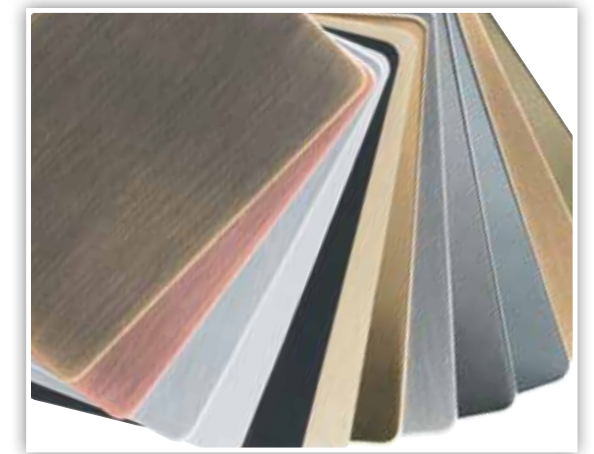

Gloss Colors (7)

Satin Colors (20)

Architectural Matte Colors (10)

Architectural Metal Finishes (12)

Matching wallplates (up to 6-gang) and accessories add a finishing touch to a room.

Accessories

Shade styles and fabrics

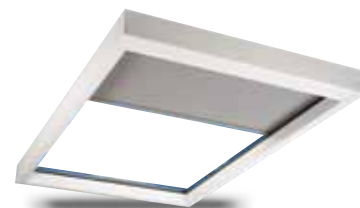

Our automated shades are available in a variety of styles so you can choose the type that works best with your home's design.

Battery Powered Shades
Provide a 3-year battery life

Draperies
Offer daylight control in pinch pleat or ripplefold styles

Skylight Shades (Tensioned)
Maximize the view when open

Roller Shades
Provide precise alignment of multiple shades

Kirbé® Vertical Drapery System
Eliminates stackback with its one-of-a-kind drapery roller system

Meet-in-the-Middle Shades (Tensioned)
Can accommodate openings up to 24 feet

Venetian Blinds
Control the tilt of the slats and lift of the blinds independent of one another

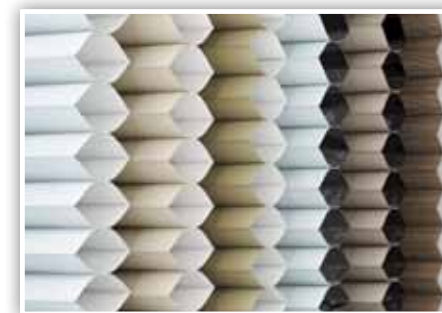

Roman Shades
Feature CERUS® safety technology, which eliminates exposed cords

Bottom Up Shades (Tensioned)
Close from bottom to top

We welcome customer's own material requests in addition to our well-rounded collection of shade fabrics.

Bringing pleasure to you

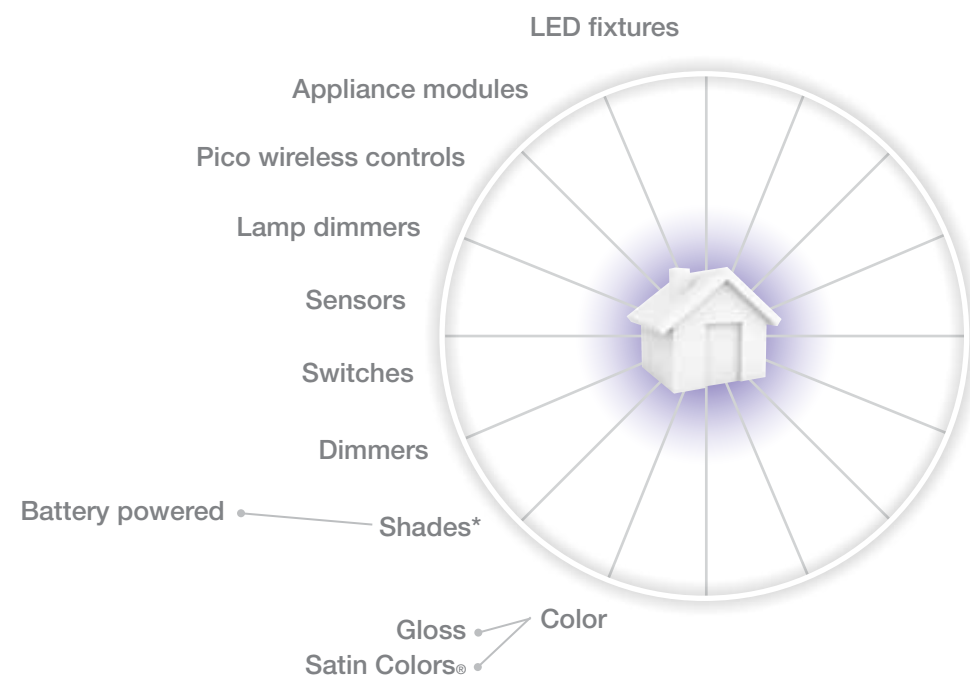

We offer three different systems that all provide pleasure, for a solution for any size home. When you add Lutron® control and all the benefits it affords, you'll wonder how you ever lived without it.

Maestro Wireless®

Maestro Wireless is a wireless mini-system that's ideal when you want individual control in a single room or a few rooms.

Characteristics

- Perfect for installing in existing rooms; no new wiring required
- One Pico® wireless control can control up to 10 Maestro Wireless dimmers, lamp dimmers, or switches
- Occupancy sensors automatically turn lights on and off
- Appliance modules turn off standby power to small appliances

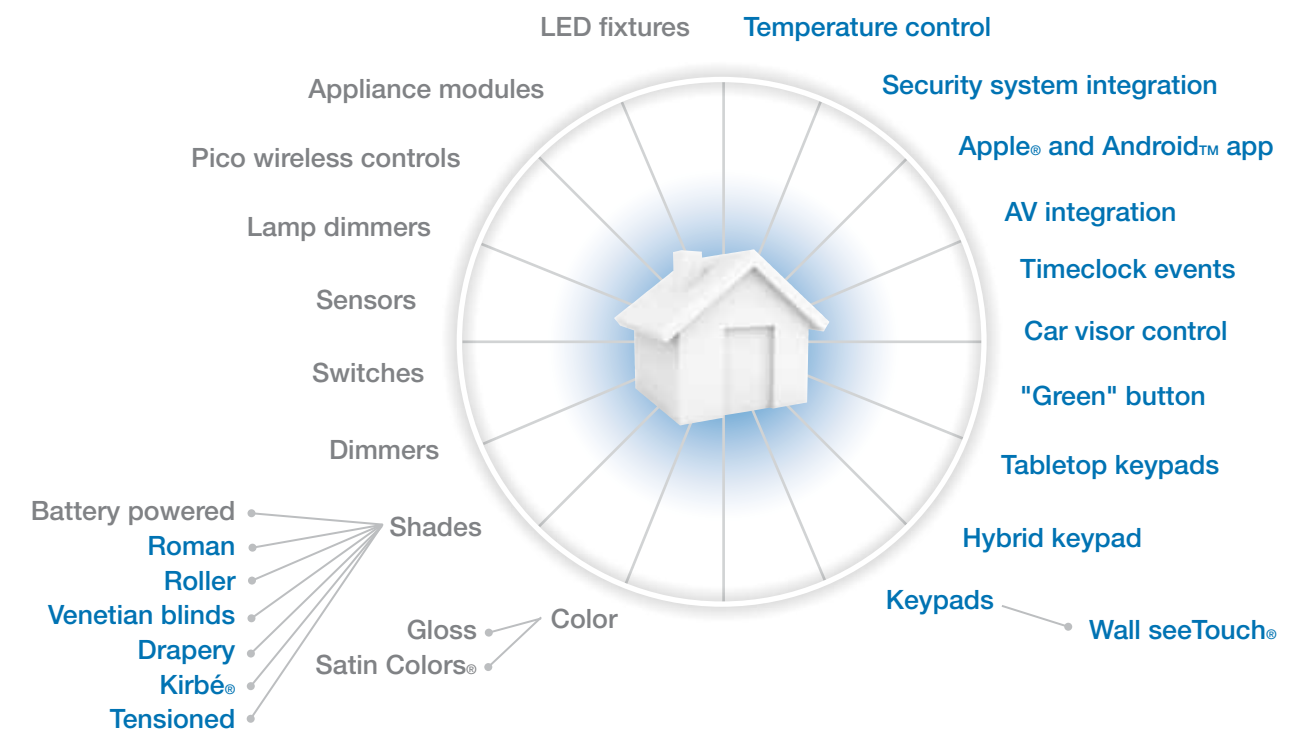

*Shades and lights are controlled independently of one another

RadioRA® 2

RadioRA 2 is a wireless system that's ideal for coordinated control in a few rooms or a whole home (up to 5,000 square feet).

Characteristics

- Can control temperature
- Controls the full line of Lutron shades
- Can control shades and lights simultaneously
- Utilizes keypads
- Can integrate with your security system

Bringing pleasance to you

HomeWorks® QS

HomeWorks QS is a wireless, wired, or hybrid system for control of a whole home (up to 30,000 square feet or more).

Characteristics

- Offers the most color choices for controls
- Offers the most keypad options, including customized keypads
- Hidden panels eliminate dimmers and switches on the wall
- Offers Vacation mode for added security while you're away from home for an extended time

Consider Lutron for all your new and existing residences

Enjoy the benefits of a wireless Lutron system in your primary home as well as in your vacation home, on your yacht, or in a guest house on your property.

And when you're away, your Lutron system will create a lived-in look. So you can rest assured your home will stay secure.
